GARDEN SAUNAS & TUBS

"Diabaz" Stove

BW-23 Hot Tub

"Panorama" Sauna

*Life Polska opens a magical world of fortitude, healthy body and pure-mindedness. We propose a lifestyle, cultivated for centuries, aimed at health and vitality. Welcome to the world of garden saunas and tubs.*

NATURAL SPA,  
PERFECT LEISURE AND GREAT FUN FOR THE ENTIRE FAMILY

# SAUNA TYPE : 'PANORAMA' OVAL SAUNA

"DIABAZ"  
WOOD-FIRED STOVE

"HARVIA"  
ELECTRIC HEATER

We own and offer our unique in-house solution of wall log joints which prevents the penetration of water, precipitation and prevents the effects of wood drying out, which is significant for the life of the sauna. Our key joint is protected with the law of Republic of Poland – we were the first in the world to apply this solution. The vertical walls are made of laminated wood (water-proof joint).

# SAUNA TYPE : "BARREL" GARDEN SAUNA

VESTIBULE

ADDITIONAL ROOF

Prices  
in PLN

The "Diabaz Tower" stove is our in-house design. It is ideal for direct pouring of water as well as it maintains a required humidity by means of a dosing evaporator. The inspection hole and feed are situated outside, which prevents bringing the fuel into the sauna and ventilating it unnecessarily. The external operation of the stove prevents the access of fumes inside.

# WOODEN COLD AND HOT TUBS

Prices in PLN

Hot tubs have been known since 2 thousand years. In the area of Scandinavia, through the Baltic countries, Russia and China to Japan, they are a traditional method of maintaining good health and well-being, especially in the period of winter frost. Proper use of hot-tubs relaxes and increases the body's immunity and strength. Baths in a garden hot-tub have a very positive impact on the circulatory system, respiratory tract, metabolism, and fight obesity, diseases of the joints and rheumatic pain.

# HOT TUBS WITH LAMINATE SHELLS

Filter housing! BW23

Garden hot tubs with laminate shells made of resins used for the production of pools and yachts are a perfect solution to ensure cleanliness and facilitate the maintenance as much as possible. A hot tub with a laminate shell is a solution that ensures 100% leaktightness without the necessity to keep water in the tubs, as the laminate does not dry out. The thickness of walls is 6 cm at average and comprises of an external wood layer and the internal laminate as well as thermal insulation made of polyurethane foam between these layers.

# BRINE GRADUATION TOWERS

Balneology is one of the oldest medical practices applied in health resorts. It is preoccupied with the study of healing properties of underground water, brines and therapeutic mud, especially in the therapy of chronic diseases. The brine graduation towers may be applied at home and in a professional SPA, in salt grottos and relaxation rooms after warm baths and sauna sessions.

## BRINE GRADUATION TOWER

**TS-01** Wooden brine graduation tower with the dimensions of: height 190, width 80, depth 40 cm.

Brine graduation tower with dimensions of 40 cm x 80 cm x 190 cm, made of spruce, larch or Siberian cedar. The graduation tower is complete and includes: a brine container, stainless-steel pump, led lighting with a remote. The brine should be prepared by own means using Wieliczka or Ciechocinek salts. The best salt to make brine is a salt with high content of microelements and iodised.
